Bachelor's, information technology, 2015

**Sikkim Manipal University** - hawally

The Bachelor of Science in Information Technology (BScIT) is a three-year program that prepares students to be IT professionals well-versed on IT applications, including web, database, programming, and networking technologies. Students will have a solid IT foundation and will learn how to plan, install, customize, operate, manage, administer, and maintain Information Technology infrastructures. The program provides a solid foundation in IT, with a background in both software and hardware management, and additional emphasis on strong database management skills.

Generally, software and information technology companies look for people who have strong programming skills, system analysis, and software testing skills.
